React-native task

Task description

Create an application using React-native and Redux

- The application must be built using reusable component as much as you can.
- The application consists of two screens:
 - Login screen (You will create it with your own design)
 - Home screen (looks like below image)
- The application has two scenarios:
 - If user logged in: The home screen is appeared like below image.
 - If user isn't logged in: The bottom nav bar will disappear and login button appears at the top of the home screen.
- Use the following endpoint to call the services at home screen.
<http://165.22.1.13:9081/client-city/3?size={anySize}>
- Handle scenario of login as if there is a token return from an api (doesn't exist).

Delivery:

- Upload your code to a github account, send the URL and specify the time you spent in task.
- Deadline: 1 Sept 2022 at 12A.M
- You are free to add any needed feature to the task.
